***Growing Up Bilingually: Opportunities,
Challenges, and Achievements***

Paola Colozzo, Ph.D., RSLP

Assistant Professor, UBC School of Audiology and Speech Sciences

Stefka Marinova-Todd, Ed.D.

Associate Professor, UBC School of Audiology and Speech Sciences

This presentation will begin with information from an international study about the educational opportunities available to bilingual children with developmental disabilities in three countries, including Canada. Following this, the presenters will focus on two specific studies that show what bilingual school-aged children with autism spectrum disorder can achieve.

April 21, 2016 | 1:00 p.m. - 2:30 p.m. | 2125 Main Mall, Neville Scarfe Room 200

RSVP: [http://ogpr.educ.ubc.ca/Frewing Apr21-2016](http://ogpr.educ.ubc.ca/Frewing_Apr21-2016)

***Thinking Outside of the Box: Solving Behavioural
Problems with Structured Preference Assessments***

Tyla Frewing, MSc, BCBA

UBC doctoral student (ECPS) and Behaviour Analyst with Semiahoo Behaviour Analysts, Inc.

Structured preference assessments have long been used to identify reinforcers that promote positive behaviours and acquisition of new skills in a variety of contexts. Preference assessments can also be used to help solve a variety of problems that may arise when providing behavioural treatment in school, home and community settings. This presentation will include a brief overview of common structured preference assessments, followed by a series of examples illustrating how these assessments can be used in unique ways to address common challenges in providing home, school, and community-based treatment for individuals with developmental disabilities.

1.5 Type 2 Continuing Education Units (CEUs) are available free of charge to BCaBAs and BCBA's who attend this event. Sign in and sign out will be required, and you must bring your certificant number with you to the event.

May 10, 2016 | 10:30 a.m. - 12:00 p.m. | 2125 Main Mall, Neville Scarfe Room 310

Treatment of Anxiety in Autism Spectrum Disorder

Sara White, Ph.D., BCBA-D

Clinical Director, Sendan Autism and Behavioral Services, Bellingham, WA

Anxiety is one of the most common co-morbid diagnoses for individuals with autism spectrum disorder. Behavioral conceptualizations of anxiety using operant and respondent conditioning will be outlined. Treatments based on both types of conditioning will be described using specific case examples.

1.5 Type 2 Continuing Education Units (CEUs) are available free of charge to BCaBAs and BCBA's who attend this event. Sign in and sign out will be required, and you must bring your certificant number with you to the event.
