Building Capacity: Teaching a Community Support Provider to Implement Positive Behaviour Support in Family

Dr. Brenda Fossett

Instructor, UBC Department of
Educational & Counseling Psychology
and Special Education

This presentation will describe the results of a research study in which a service provider was trained to conduct a functional behaviour assessment and implement a positive behaviour support (PBS) plan with a mother and her son, who was diagnosed with autism, deafness, and cerebral palsy. Strategies for achieving goodness-of-fit between the interventionist, parent, and child will be emphasized, with video clips to illustrate key outcomes.
